

*A Canadian gold mining and exploration company focused on the successful development of its Holt-Holloway and East Timmins properties.*

## **SENIOR MINE ENGINEER**

As Senior Mine Engineer, you will be in charge of all the technical aspects of an underground mine operation. You will be responsible for mine design, mine production scheduling, budgeting and performing financial evaluations. Additionally, you will provide direction and technical support to the mining department, inclusive of employees and contractors.

As the successful applicant you will have a minimum of three years relevant experience, a BSc in Mine Engineering. You have excellent verbal and written communication skills, are well organized and able to deliver presentations. You will have demonstrated experience working positively as part of a diverse team consisting of technical and professional people. You are adaptable and thrive in a changing creative and energetic environment. Software skills will ideally include Autocad, Mine 2-4D, A-Mine and MS Office products. You are passionate, think differently about mining, and it shows in your operating style and your work.

St. Andrew Goldfields offers competitive salary and allowance packages.
